

Delete the Abstract and Replace with the Following:

A method of fabricating an electrical interconnection element having a contact tip structure, the method includes forming a contact tip structure on a sacrificial substrate. Prior to constructing the contact tip structure, providing a texture in an area of the sacrificial substrate which is formed with the texture; attaching an electrical interconnection element to the contact tip structure to form a first structure having the electrical interconnection element and the contact tip structure; and removing the contact tip structure from the sacrificial substrate wherein the first structure is compliant after said removing of the contact tip structure.
